

## SO<sub>2</sub> Upgrade for 973-SF<sub>6</sub> Analyzer

---

### Latest Specifications

The 973-SF<sub>6</sub> is the most accurate and stable SF<sub>6</sub> gas analyzer currently available. With integrated SF<sub>6</sub> collection and pump back, it is the reference in the analysis of SF<sub>6</sub> and will exceed all current SF<sub>6</sub> measurement specifications. The SO<sub>2</sub> upgrade adds further functionality and extends the specification of the 973-SF<sub>6</sub> still further.

### Reference

Chilled mirror technology provides accuracy and stability for both dew/frost point and SF<sub>6</sub> purity. Users can be easily trained to achieve excellent measurement reproducibility and dependable results. Incorrect measurements from inferior instruments can waste time on site, waste SF<sub>6</sub> gas and can cause unnecessary SF<sub>6</sub> handling.

### Gas Recovery

The 973-SF<sub>6</sub> integrated gas handling system makes life easy for engineers performing measurements in SF<sub>6</sub>. The instrument needs no separate gas collection equipment. Tested SF<sub>6</sub> gas can be pumped straight back into the compartment or to another collection vessel without any loss of gas.

### SO<sub>2</sub> Functionality

Measurement of SO<sub>2</sub> concentration in SF<sub>6</sub> is increasingly popular in maintenance and system health checks. The 973-SO<sub>2</sub> upgrade includes a mechanical modification to switch gas flow through an integrated SO<sub>2</sub> measurement cell using the existing sample gas connection.

### SO<sub>2</sub> Maintenance

Since SO<sub>2</sub> sensors need routine replacement (approximately every 2 years), the measurement cell is mounted externally to the 973-SF<sub>6</sub> so that the user can easily replace the sensor when required. In combination with the high stability of the chilled mirror system, this means that the 973-SF<sub>6</sub> does not require frequent and costly return to the supplier or manufacturer.

### Compatible

The SO<sub>2</sub> upgrade can be factory applied to all 973-SF<sub>6</sub> Analyzers. However, older instrument may require more adaptations in order to work with the new SO<sub>2</sub> module. Please contact us to verify your serial number and get a reliable cost estimate.

### Service and Calibration

As part of the SO<sub>2</sub> upgrade, the instrument will be serviced and calibrated to original factory specifications. A calibration report will also be included.

---

## SO<sub>2</sub> Upgrade Details

- Instrument pre-check
  - General cleaning
  - Inspect, clean and test sample tubes and internal cylinder
  - Replace back panel components
  - Modify internal wiring
  - Fit SO<sub>2</sub> measurement module
  - Fit calibrated SO<sub>2</sub> sensor and printed circuit board
  - Upgrade instrument firmware version
  - Check functionality, control and coefficients
  - Pressure calibration
  - Dew/frost point calibration
  - SF<sub>6</sub> Calibration
  - Upgrade Report
  - Calibration Report
-

## Specifications 973-SF<sub>6</sub> Analyzer

<b>Measuring range:</b>	
Frost/Dew Point	-50...+20 °C
Humidity content by volume	40...20'000 ppm <sub>v</sub>
Humidity content by weight	5...2'500 ppm <sub>w</sub>
Volume SF <sub>6</sub>	80...100%
Inlet pressure	100...1'000 kPa abs.

<b>Accuracy:</b>	
Frost/Dew Point	± 0.5 °C
ppm <sub>v</sub> / ppm <sub>w</sub>	± 1 ppm +6% of reading
Volume SF <sub>6</sub>	± 0.5%
Pressure	± 3 kPa

<b>Standard Features:</b>	
Digital I/O	RS-232
Thermoelectric mirror cooling	3-stage
Mirror temperature sensor	RTD (Pt-100)
LCD display with touch screen	5.7"
Internal gas tubes	Stainless Steel 316L / FEP
Gas connections	Quick connect fitting (Swagelok® QM Series)
Couplings	Dilo DN8 (VK/F-02/8) and DN20 (VK/F-02/20)
External sample gas tube	6 m stainless steel armored PTFE tubing
ORIS	<b>Optimum Response Injection System</b>
Transport Case	Custom fit foam lined Peli 1620
Power Cable	2.5 m
Operating instructions	English, French or German
Calibration certificate	Pressure calibration, 2-point dew/frost point, 3-point volume %SF <sub>6</sub>

<b>Optional:</b>		
Internal SO <sub>2</sub> -Module	Range:	0...500 ppm <sub>v</sub>
	Linearity:	< ± 2% of range
	Sensitivity drift:	< 4% / year
	Response time:	< 30 s

<b>Additional Information:</b>	
Supply voltage	100-120 VAC / 200-240 VAC, 50/60 Hz (auto switching)
Supply voltage fluctuations	up to ± 10% of nominal voltage / Overvoltage category II
	Rated pollution degree 2
Power consumption	200 Watt
Pump back pressure max.	900 kPa
Cooling	Air
Operation Temperature	-10°C...+40°C (Storage Temperature -20°C...50°C)
Humidity	Maximum relative humidity 98% RH, non-condensing
Outdoor use	Permissible, instrument must be protected against exposure

<b>Weights &amp; Dimensions:</b>	<b>Instrument</b>	<b>with Transport Case</b>	
	Width	420 mm	650 mm
	Height	155 mm	370 mm
	Depth	390 mm	510 mm
	Weight	16.5 kg	32 kg
